## Insurance

In principal you should have a liability insurance, in order that you would not have to pay, if you cause a damage. Liability insurance pays:

- ✓ Damage to rental: Damage in the flat (for example water damage)
- ✓ Damage to persons: If you injure a person by accident
- ✓ Damage to property: If you destroy the items of another person

The liability insurance would not pay, if you cause the damage on purpose.

## House Rules

**Hausordnung**

As a tenant you have specific obligations for living together with all other tenants. Make sure that conversations and music are only at room volume.

✓ **Rest periods:**

You should avoid noise and follow the rest periods rules. The mandatory rest periods in Germany are between

**13:00 o'clock and 15:00 o'clock,**  
**between 22:00 o'clock and 06:00 o'clock and**  
**on Sundays and official holidays all**  
**daylong!**

- If you want to throw a party, you should inform your neighbors. In that way you could avoid that the neighbors call the police because of the party noise.

✓ **Cleanliness:**

You **must** keep your flat, the hallway and the stairs clean. There is mostly a cleaning schedule, which must be definitely followed.

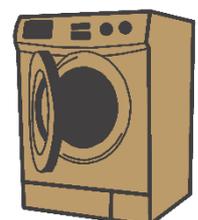

✓ **Waste separation:**

The garbage is collected and disposed separately in Germany. Everyone has four different garbage cans: the **yellow** one for plastic waste, the **blue** one for paper waste, the **brown** one for organic waste and the **gray** one for residual waste. Specific separation and disposal of batteries, glasses, electronic trash and bulky waste! (see flyer of ZVO)

## **Washing and Drying**

If it is possible, dry your laundry in an electronic laundry dryer. Pay attention to the care of the machine!

If you dry your laundry on a laundry rack, pay attention to aeration, otherwise there is **mold risk!**

In case of mold there could be trouble between you and your landlord. Mold is also health hazardous!

## Saving tips

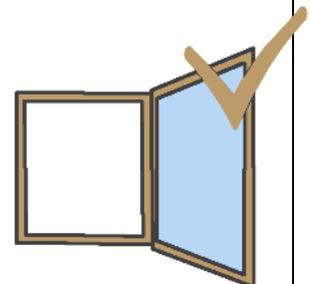

You should switch the heating to 3. To switch it on to 5 means high heating bills!

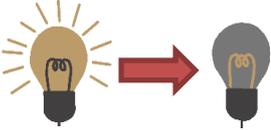

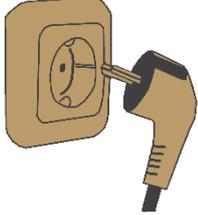

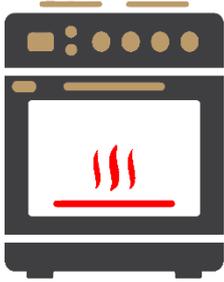

Do not leave the water unnecessarily on. Fill the sink with the water and wash the dishes in the sink. In that way you use less water.

Air the room directly after cooking, taking a shower or bathing. Open the window completely at least three times a day and while doing that turn the heating down.

<p>Turn off the light, if you do not need it.</p>	
<p>Turn the electronical devices off, which you do not use.</p>	
<p>Do not use the baking oven frequently. Baking oven uses a lot of electricity.</p>	

Do not forget that you must pay the additional costs **yourself** in your own flat!
